

Please share with your association members, students, employees, and others who will benefit!

As we gear up for a busy and exciting summer, we wanted to share some important updates and opportunities available through the METAL program.

### **Online Training:**

Our no-cost, self-paced, online training is available and we encourage all partners to take advantage of it! These modules are a great way to learn foundational concepts in casting, forging, and metal manufacturing. Registration is quick, easy and open to anyone, so feel free to share this link with your students, employees or customers.

Register here:

### [Online Training - METAL](#)

METAL | Cast. Forge. Create. Forge your future in metallurgy with no-cost online classes. Join the next wave of creators and pioneers needed to revive and advance our domestic metal market and restore our nation's metal manufacturing base.

### **In-Person Bootcamps:**

All of our METAL partner universities will host hands-on in-person bootcamps this summer. These immersive week-long sessions are designed to deepen technical knowledge, provide practical experience, and introduce participants to the advanced tools and techniques shaping the future of U.S. metal manufacturing. From melt labs to metalworking, these experiences are a cornerstone of the METAL program's impact. To attend, please visit our events page and select the location closest to you. You will then be redirected to the registration link on our partners' website. More sites coming soon so check back often!

### **Why It Matters:**

Led by IACMI – The Composites Institute® and funded by the Department of Defense, the METAL program exists to strengthen and diversify the U.S. metal manufacturing workforce. We appreciate your partnership, which helps ensure that casting, forging, and plate rolling continue to thrive as essential parts of our defense and industrial base.

Let us know if you need materials, graphics, or additional support to help promote these opportunities. We're here to help and excited for what's ahead!

Warmest Regards,  
Lucinda
